

MAKE YOUR ELEMENT ICF HOME MORE WILDFIRE RESILIENT

1

USE CLASS A ROOF COVERING

- Class A fire-rated roofing products offer the best

2

CLEAR DEBRIS FROM ROOF

- Regularly remove debris from your roof as it can be

3

KEEP EMBERS OUT OF EAVES & VENTS

- Use 1/8" non-combustible mesh to cover vents.

4

REDUCE SIDING RISKS

- Maintain a 6-inch ground-to-siding clearance.

5

REDUCE DECK RISKS

- Use deck boards that comply with state and provincial requirements for new construction in wildfire-prone areas.

6

REDUCE FENCE RISKS

- Burning fencing can generate embers and cause direct flame contact to your home.

7

INSTALL NON-FLAMMABLE GROUND COVER FOR FIRST 5 FEET AROUND THE HOME

- Use non-combustible materials such as gravel, brick, or concrete in this critical area adjacent to your home.

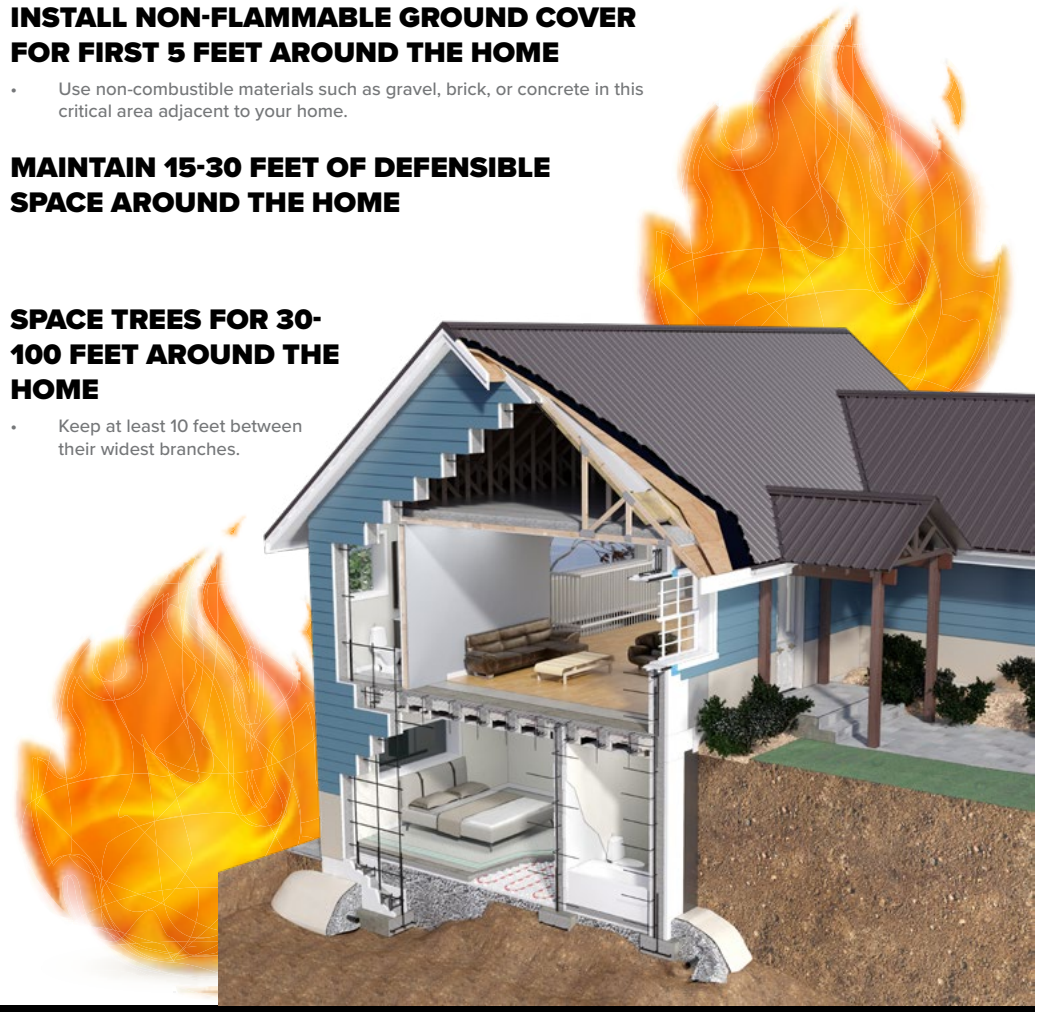

8

MAINTAIN 15-30 FEET OF DEFENSIBLE SPACE AROUND THE HOME

9

SPACE TREES FOR 30-100 FEET AROUND THE HOME

- Keep at least 10 feet between their widest branches.
